

RAZOR™

An analytics engine designed for industry that leverages analytics & machine learning to detect and deter issues that degrade performance.

Your data, insights now

RAZOR™

Security

- Ingest - RS256 token-based identity verification with TLS encryption for data in transit
- Data Storage - 256-bit AES Encryption
- Notifications - webhooks and token-based identity verification with TLS encryption

Technology

- Timeseries, text-based, image/video
- No data preparation required
- Containerized
- Elastic scalability

Value

- Minimal effort for data analysis
- Reduced time to insight
- Improve productivity
- Focus on high value activities
